KM History at MITRE

KM Supporting Technology

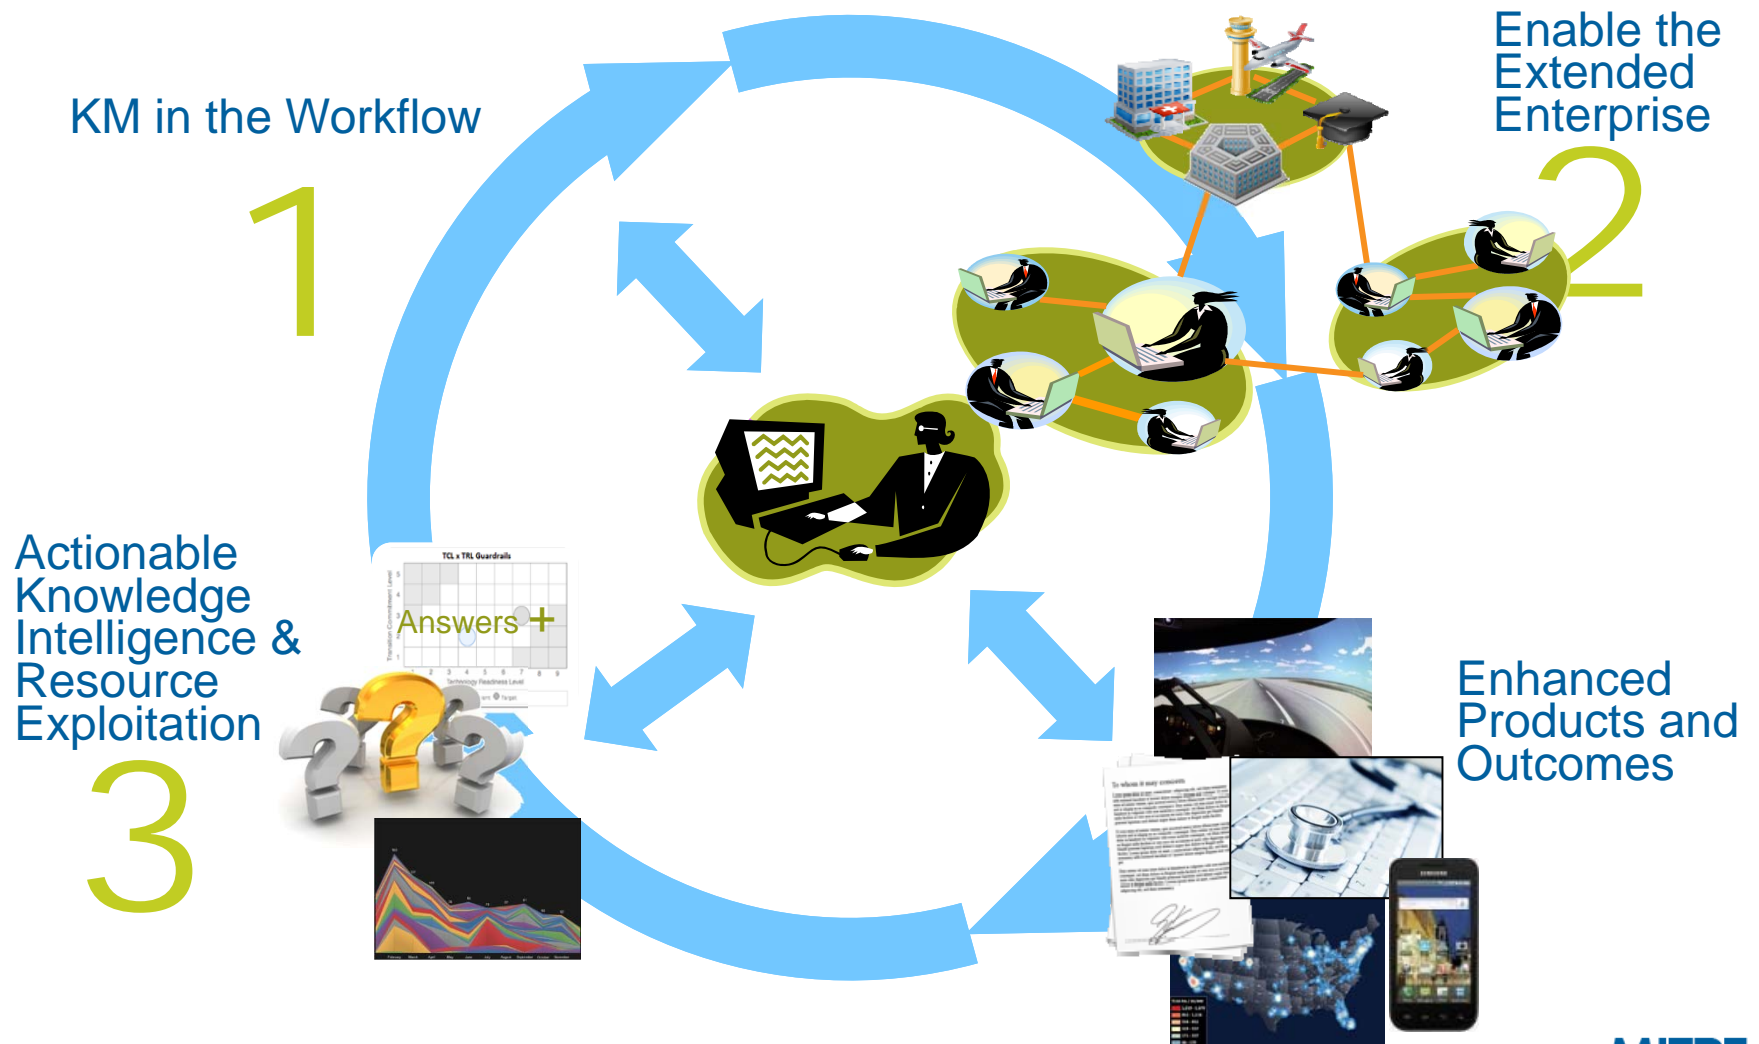

Knowledge-Driven Enterprise (KDE) Strategy

Desired Transformations

From	To
MITRE staff as our users	MITRE and partners as our users and key collaborators
Email as our primary external collaboration and work product delivery platform	Support more sophisticated collaboration with partners through co-engineering, networking, and electronic access to lab demos, resources and processes.
MITRE as system host	MITRE as a participant and/or trusted third party in multi-organizational/multi-platform environments . Agility and velocity.
Managing knowledge artifacts/products	Comprehensive, “in-flow” KM support of key outcome-driven operational and socio-collaborative processes.
Inconsistent stewardship of key resources and capabilities	Comprehensive, appropriate-level, automated-where-possible, stewardship of key resources and capabilities
Application-level information architecture	Enterprise information architecture . Primary and secondary use is designed into information flows.
User initiated retrieval, keyword search	Users leverage a rich, unified, knowledge base . Anticipatory knowledge delivery via recommenders, actionable intelligence, question answering, “dots connected”
Activity/usage based metrics, lack of work program insight, KM survey	Healthy information that drives and informs our decisions, provide insight
One way broadcast and publication of information	Social-enabled processes and peer production as richest source of value creation
Open MII, closed enclaves for sensitive information	Systems support information of varying sensitivity levels as seamlessly as possible. Support for anywhere, anytime access.

The Knowledge-Driven Enterprise

1 - KM in the Workflow

Design a knowledge infrastructure to enable end-to-end integrated process support with KM in the workflow.

- Integrated systems
- Capture of high value products in the flow
- Just-in-time presentation of templates, best practices, targeted information

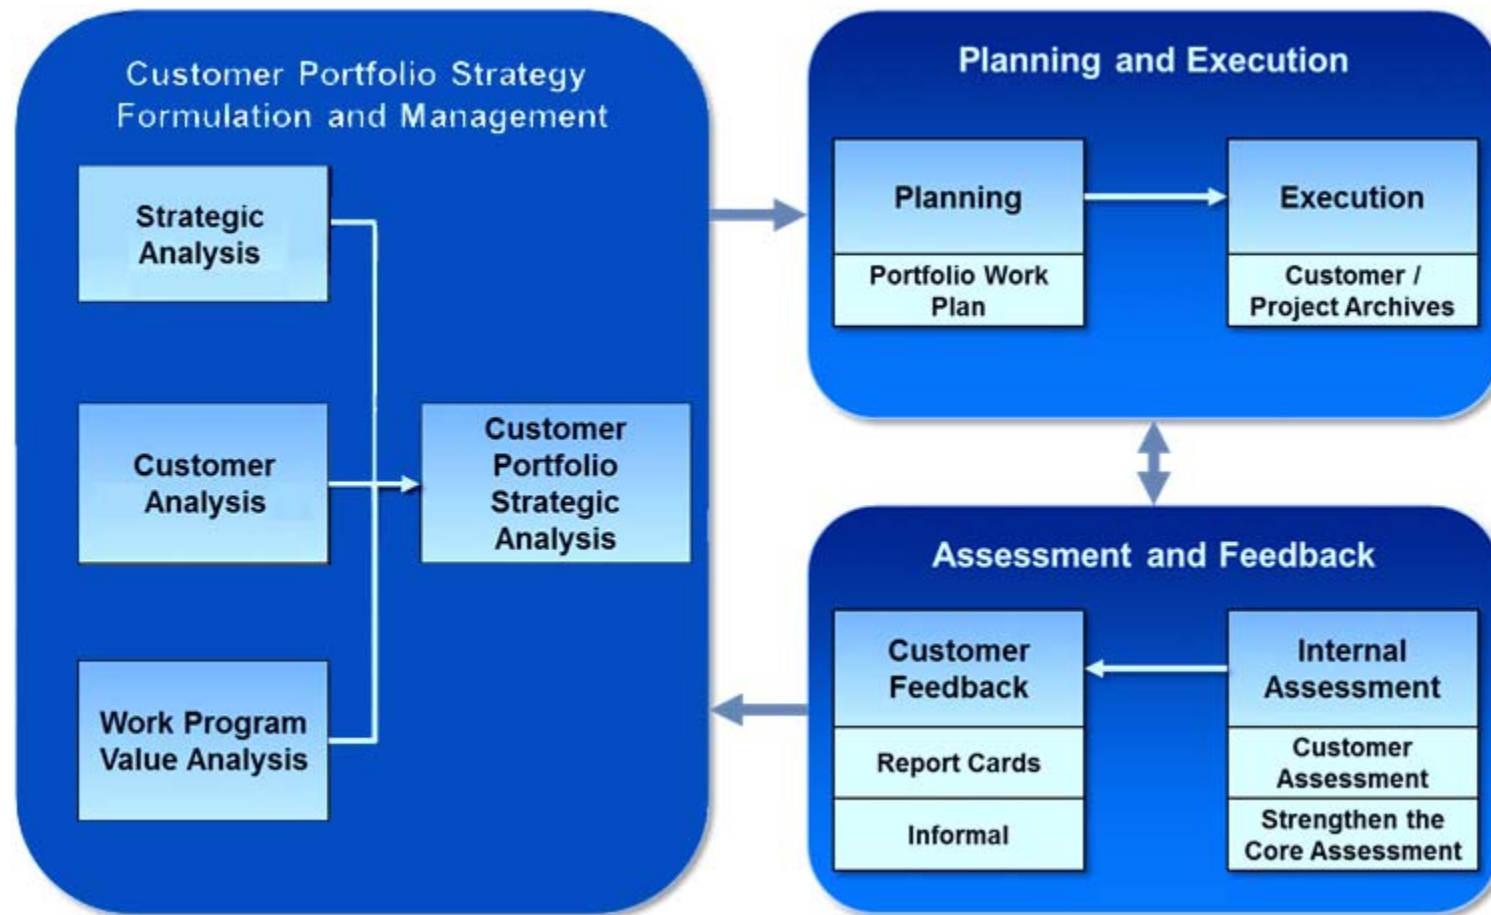

KM tied to
strategy and
outcomes

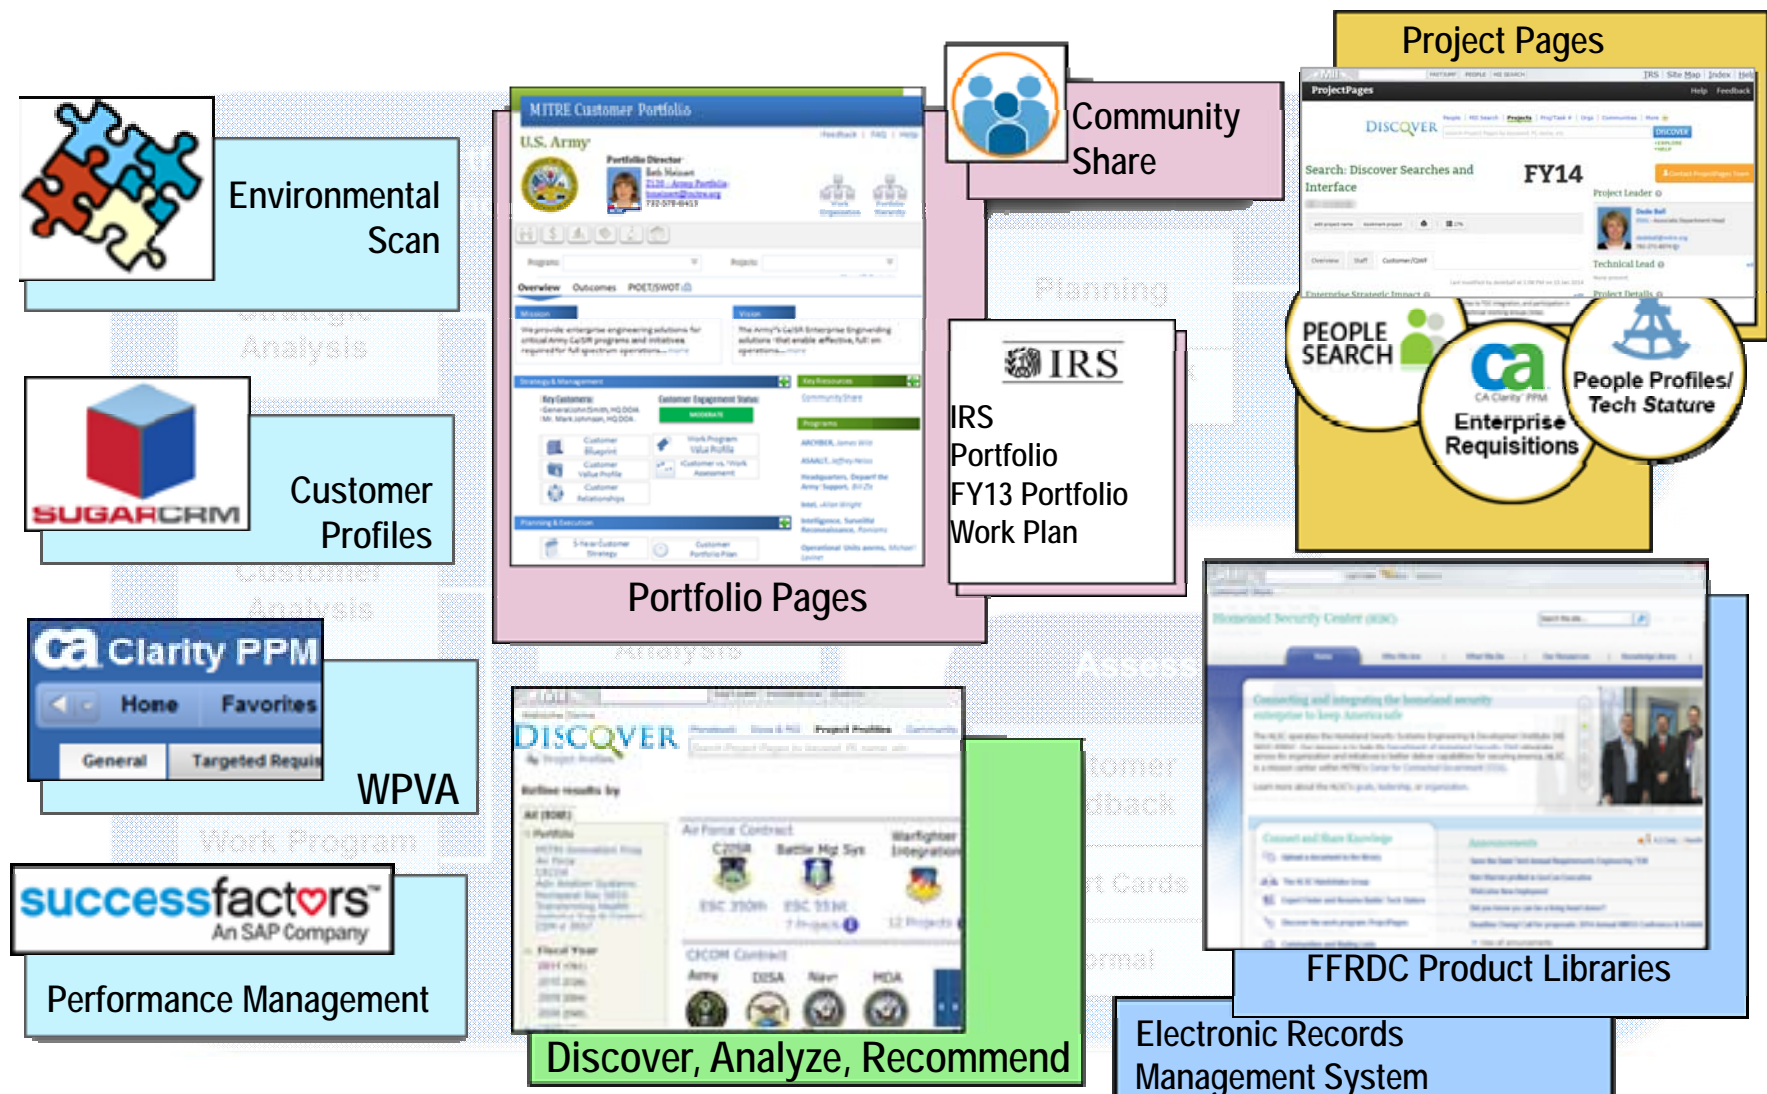

Higher
impact work

Corporate Change to Strategic, Outcome-Based Work Program Management

FY13-FY14: KDE for the MITRE Way Integrated Systems with KM in the Flow

Portfolio Pages - Strategic, Outcome-Based Work Program Management

PORTFOLIOS

Welcome to the MITRE Way Customer Portfolio pages. The Portfolio leaders are in the process of filling out their Portfolio Page. Click here to request data changes on the Portfolio hierarchy and project mapping. To edit Mission, Vision, or Goals click on the "Enable Editing" link in bottom right hand corner.

Services and Joint > **OSDA**

Carbone, Patricia L.
OSDA Portfolio Director
2040 | NSIC
301-617-3347
carbone@mitre.org

Mission
Provide leadership through recommendations, requirements, roadmaps, architectures, risks, risk mitigations, technologies, performance evaluations, new practices and approaches to address practical issues of integration and interoperability within OSD utilizing numerous engineering and architecting skills

Vision
OSDA becoming the Enterprise Service Department of Defense.

Goals
1. Successful delivery of OSD services
a. Identify and exploit OSD capabilities
b. Leverage OSD capabilities
c. Deliver OSD capabilities

Program Areas
There are no Program Areas

Associated Oracle Project/Task Codes
MULTISET INFO SHARING (PYSI)
WICA ENTERPRISE ENG (PYSK)

Customer Outcomes
Click on the Customer Outcome title to review its Quality Work Flow

- OSDA will become the Enterprise Service Provider of Choice for the Department of Defense by the end of FY 2015.
- OSDA will improve the flow for all Mission Critical enterprise services, to include current services, and c) deliver new enterprise services to customers in support of Mission needs without compromising the integrity of the OSDBM by 25 percent per year starting the end of FY 2014 while meeting the quality of service required.
- OSDA will provide national leaders secured access to critical Command, Control, and Communications capabilities by end of FY 2014.
- OSDA will provide Command and Control, Intelligence, Logistics, Planning, and Coalition Interoperability Mission services that reduce cost by 50% and the time from start of development to deployed operational capability to 6 months by the end of FY 2017 while meeting the quality of service required.
- OSDA will improve operations and delivery of the OSDBM by providing Commanders with a common operational picture of the enterprise, the ability to discover and assess mission impact, the ability to proactively take corrective action, and the ability to proactively inform customers by the end of FY 2014.
- OSDA will provide cost appropriate enterprise services by

Project Pages – Yearly Project Plans and Outcomes

The screenshot displays the MITRE ProjectPages web application. The top navigation bar includes links for FASTJUMP, PEOPLE, MII SEARCH, IRS, Site Map, Index, and Help. The main header features the 'ProjectPages' title and a 'DISCOVER' search bar. The page is titled 'Enterprise Strategic Impact' for 'FY14'. It includes a 'Project Leader' section with a profile for Dede Ball, a 'Technical Lead' section (currently none present), and a 'Project Details' table. The table lists Project Org, Type, Project size, Performance period, and Status. The 'Customers' section shows 'MITRE Staff' with a list of two items: 'Center Product Library Searches: 2 in FY14' (ON TRACK) and 'Improved Performance under 2x load' (COMPLETED). The page also includes an 'Export to PowerPoint' button and an 'End Users & Sponsors' section.

Experiences

MITRE Experience

2008 - now **MIP "Information Sharing for the Extended Enterprise" Investment Area lead**
 MIP Investment Area leader, Corporate Technology Integrator
 Currently the investment area lead for our Information Sharing for the Extended Enterprise (formerly Social Networking for the Enterprise) MIP investment area. This investment area has helped to provide innovative new sharing capabilities, such as Handshake, that allow MITRE to strengthen partner engagements, collaborate across organizational boundaries in a trusted way, and provide differentiated value. Our longitudinal evaluation to assess the business value of a multi-organizational sharing capability is unique within the community. Currently, we are planning new expanded capabilities for enhancing our partner engagement strategy via the MITRE Partnership Network. This includes integrating infrastructure elements such as identity, access control, a partner portal, and a common notification service, as well as new federated collaboration services and easy integration with center and project-produced capabilities.

1996 - now **MII/Enterprise Knowledge Sharing and Collaboration**
 Chief information architect/Assoc Dept Head/project leader
 Responsible for knowledge sharing strategic planning, design and development, enterprise information architecture, and enterprise social software strategy. I joined the Bedding MII project in its early years, and worked almost continuously since then.

exploitation

Efficiency in
work &
outcomes

What Do People Want to Know?

Project Staffing/Talent Management

- Who has these technical skills, soft skills, availability, experience, clearances, reputation...?
- Where are the gaps in needed skills?

Key Resources

- Administrative gold source sites
- Project deliverables & recommendations
- Best practices & lessons learned
- Technical accomplishments & papers
- Stewarded communities of practice
- Resources available for reuse

Skill Network & Behavioral Analysis

- What people, projects, communities and organizations are available in this area?
- Are they talking to each other?
- What are people doing and using?

Work Program & Customer Experiences

- What is the customer's portfolio & strategy?
- What is the project plan?
- Who wrote a SOW?
- Who else works with this sponsor?
- Are we delivering the outcomes?
- What existing research can be leveraged?

Technical Stature

- Which organizations have these skills?
- What accomplishments does this person have?
- Who is similar?
- What are their experiences?

MyMII
